

Umesh Sahu

Full Stack Developer | Immediate Joiner

✉ umeshsahu32@gmail.com ☎ +91 8962414992 📍 Bangalore, India [in](#) [LinkedIn](#) [Github](#) [Portfolio](#)

Enthusiastic developer with a strong background in Full Stack Development, offering 1.9 years of experience and expertise in React JS, JavaScript, Node JS, HTML, CSS, MySQL, MongoDB, SASS, Redux & Rest APIs.

Experience

Full Stack Developer at Codeswift Technology, Bangalore

March 2022 - Present

Project 1

- Developed a Ed-Tech application that streamlines scheduling by implementing an efficient appointment scheduler, allowing educators and students to book and manage appointments seamlessly. *Technology Used - React JS, Javascript, Redux, React Custom Hooks, HTML, CSS.*
- Integrated a real-time chat feature, facilitating direct communication between instructors and learners. *Technology Used - Socket IO, MongoDB.*
- Implemented a multimedia feature enabling users to upload and share educational content, including videos and PDF documents.
- For the mentioned functionalities, REST APIs have been developed using Node.js, seamlessly integrated with a MySQL database

Project 2

- Developed a E-auction application designed to facilitate the buying and selling of vehicles. This dynamic web application, built using React, Redux, Bootstrap, and custom CSS, enables users to bid on vehicles listed by others or auction their own vehicles.
- Introduce subscription plans that grant users access to different vehicle categories or premium features.
- Create user dashboards to display active listings, bidding history, and subscription plan information.
- Enable users to create listings for their vehicles, complete with detailed information, and images.

Personal Project

Project 1

- Implement secure user registration and login using JWT tokens.
- Enable real-time messaging with Socket IO. Support one-on-one and group chats.
- Store chat messages in a MongoDB database. Allow users to access and review their chat history.
- Enable group chats where users can create, join, and leave chat rooms. Also Provide real-time notifications for new messages

Project Link: [React Chat Application](#)

Project 2

- Display search results in an organized and visually appealing manner. Include movie posters, titles, release dates, and brief descriptions
- Enable users to click on a movie to access more details. Show comprehensive movie information, including cast, director, ratings, and a synopsis.
- Utilize SASS for efficient and maintainable CSS styling. Ensure the application is fully responsive, providing a seamless experience on both desktop and mobile devices.

Project Link: [Movix Application](#)

Project 3

- Leverage advanced CSS techniques to design captivating and unique destination cards.
- Ensure that the application is fully responsive, adapting elegantly to various screen sizes and orientations.
- Implement CSS animations, transitions, and transforms to add interactivity and visual appeal. Use hover effects, parallax scrolling, and creative transitions to engage users.
- Utilize the SASS framework to write clean, organized, and efficient CSS code. Employ variables, mixins, and nesting for improved maintainability.
